Education

Present **B.Tech (2023 – ongoing)** — Vignan University, Computer Science (7.2 CGPA)

2022 **Class 12th (Intermediate)** — Srichaitanya Junior College, Narasaropet (881 / 1000)

2021 **Class 10th (SSC)** — Pragati High School, Sattenapalli (577 / 600)

Summary

B.Tech Computer Science student who loves learning and exploring new things. I like building small, useful products and putting them in front of real people, mostly with React and TypeScript, and I'm comfortable across the MERN stack. Right now I'm working through Data Structures and Algorithms and looking for a software engineering internship where I can learn from a team and ship real work.

Technical Skills

Programming	Java, JavaScript
Frontend	React.js, Next.js, Tailwind CSS, Zustand, Zod
Backend	Node.js, Bun, Express.js
Database	MongoDB
Tools	Git, GitHub

Projects

Kern — React Component Library Live Demo

- Designed and shipped a lightweight React component library in TypeScript, styled with Tailwind CSS, featuring a file explorer, button, footer, and an inspired-by section, ready to drop into any project.
- Applied strict typing and a modular, composable architecture so components stay consistent, easy to extend, and ready for third-party use; deployed on Vercel with a live demo.

Pia — Browser-Based HTTP Client Live Demo | GitHub Repo

- Built a Postman-inspired HTTP client that runs entirely in the browser, using a reverse proxy to bypass CORS errors so requests can be sent to any API.
- Developed with React.js, TypeScript, Tailwind CSS, and React Router; managed app state with Zustand and validated data with Zod.
- Persisted collections and request data using the local file system, keeping the tool fully usable without a backend or account.

Certifications

- AI Agents — DataCamp 2024
- Understanding ChatGPT — DataCamp 2024
- Principles of Management — NPTEL (IIT/NIT Certified) 2024
- Public Speaking — NPTEL (IIT/NIT Certified) 2024
